

Az Theatre is looking for people with video/film skills.

We want to develop Az Theatre's video presentation.

Video/film could be a major means of expression for Az Theatre.

One or two people with video experience, particularly of online video platforms and editing, would work with Az on a voluntary basis, setting up a system and creating access to Az Theatre's work.

The work would be organised so that the video practitioner(s) would have realisable short term and medium term creative goals.

There is already existing video material and plans for the future.

This work will be accompanied by a development of Az Theatre's website.

We need people who are interested in video, performing arts who are inspired by Az Theatre's innovative community and international projects.

We aspire to create good jobs and good work but currently do not have the income to pay for the talents we connect with.
